PROTECTED ENTRY / ACTUAL RAIL GENERATION / ONE MOTHERBOARD / SOURCE CANDIDATE r0.4

CORE/FIELD_A/FIELD_B entries; preserve existingFPGA1V2 andIO3 regulators, sequence and9xxx window monitors.

CORE5 bounded7A +MOTION5 6A converters; two switchedmotorfeeds; FIELD5 .6A +independentAUX limiters.

Published AUX24 overload testpoints; series raw−health photocontacts and bank−feed asynchronousclear/rearm latches.

No fabrication release; exact package/peripheral load/IRdrop andfield surge coordination require reconciliation.
